Project LEARN: The Educational Enhancement Program has five major components. Homework help and tutoring enables participants to develop the daily habit of completing homework and preparing for class. High yield learning and leisure activities encourage practical application of skills learned in the classroom. Parents and other adults are encouraged to support their children in school. Collaboration with schools enables Clubs to work with teachers to individualize plans for students to build competency in challenging subjects. Recognition and incentives for positive academic participation encourages family involvement.

1025 N. Maple Ave.
Cookeville, TN 38501
(931) 526-1562
imagineering@tnaccess.com
Web site: www.n2reading.com

The N2READING program addresses the problems of reading disabled children who suffer from Intermittent Central Supression (ICS). ICS has many of the same symptoms as Dyslexia. A comprehensive evaluation administered by an optometrist or other qualified eye professional proficient in vision training is required to detect the presence of ICS and determine if the child will likely benefit from the treatment provided through the N2READING program.

"The N2READING Corporation has participated in pioneering research to develop a system of vision training designed to address Convergence Disorders and Intermittent Central Suppression (ICS), believed to be root causes for poor reading. Many studies over the past 40 years have linked these visual problems to reading difficulties and attention problems in children whose vision is perfect in all other physical respects.

If you suspect that your child has dyslexia, attention deficit disorder (ADD or ADHD), a learning disability, or visual perception problems, the n2reading vision training program may enable him/her to become capable of learning to read more effectively."
